

ISPAD Allan Drash Fellowship Report

Recipient: Ahmed Mohamed Hassan, MD. From Tanta University, Egypt.

Host Center: Barbra Davis Center, university of Colorado, USA

Mentor: Dr. Guy Alonso

Duration: 6 weeks

Background: I am a consultant of pediatric endocrinology and DM in Tanta University Hospital, I treat many patients with type I DM. ISPAD fellowship is a great opportunity to get the newest protocols of managing DM, comprehensive care and diabetes technology.

Activities

Really it was a great experience in Barbra Davis center. I have got a deep insight into the comprehensive care of DM including the medical care, patient education, nutritional management and psychological support. I have got a detailed experience of different pumps training methods and their approach to manage blood glucose. Also, the work atmosphere was great, and the team was very helpful. Also, I had the opportunity to join adult clinic, pregnancy clinic and eye clinic to get an overview of the transition of diabetic children into adult sector. I had a great opportunity to attend the annual conference of Barbra Davis center in Keystone. It was an amazing experience with experts from all over the world. Really thanks for ISPAD, Barbra Davis team and the supporting institutions

Ahmed Hassan
